SAIC-Ecology Comments Focused Soil Excavation Work Plan 080810.docx SAIC Ecology Comments\_GTSP LLA IA Work Plan 9-10.docx

Dan,

Rick Thomas indicated that you would like to see our comments on the City and Boeing plans for excavation of PCB contaminated soil at North Boeing Field and the Georgetown Steam Plant. I have attached the comments that we provided to Boeing and the City of Seattle. These were for work that was to be done in the vicinity of the southwest and southeast fence lines of the Georgetown Steam Plant property. Please feel free to let me know if there is any other information that you need.
